

CHOICELOGISTICS
ONE WORLD • ONE CHOICE

High-IQ[©]

Choice offers unparalleled visibility into “live” orders and “historical” transactions. Welcome to a new level of transparency and analytics.

The right supply-chain decision can mean the difference between success and failure. From inventory control to transportation spend, everyone in the enterprise needs reliable information to make the right decisions based on the business situation at hand. With the market place becoming increasingly dynamic, business leaders need the right information, in the right format, at the right time. As a result, intelligent organizations are constantly striving to enable every stakeholder to gain greater business insights to eliminate inefficiencies, exploit untapped potential, and make better decisions.

Through High-IQ, Choice offers clients unparalleled visibility into both “live” orders and “historical” transactions through a single web-based interface. This new level of transparency enables clients to better manage existing orders and gain a new level of

understanding on how they are spending their money. Through a series of simple drop-down menus, clients can look at individual or aggregated orders by geography, service, carrier, and date range.

Choice’s High-IQ Suite offers unparalleled reporting, dashboard, and analysis capabilities that help your team visualize all aspects of your supply-chain. Clients see an immediate gain in decision making and productivity, including:

- Presentation-quality reports
- Reports available with real-time data
- Visual representation for rapid, informed decisions
- Create reports in an intuitive manner
- Minimal report creation time

EASILY SCALABLE

Real-time visibility: Order Management

- Real-time carrier integration-ETA, tracking and POD
- 100% of all orders: SBD and NBD
