

CHOICELOGISTICS
ONE WORLD • ONE CHOICE

Our Network

Choice exists to serve the supply-chain needs of the most demanding companies in the world.

OVERVIEW

Our clients require 24/7/365 availability, > 99.5% inventory accuracy, > 98.5% on-time performance, and < 2 hour delivery. To deliver this level of performance you need a network that is full-service, dependable, and scalable.

Our global network is a reflection of our clients' needs. Whether it's finished goods or service parts, we design our network to deliver on the specific SLAs of your end customers. Unlike most 3PL's that take the "build it and they will come" approach and spend their time selling space, Choice designs the right solution based on your unique requirements. This accomplishes three things:

- Avoids us developing a service you don't need
- Avoids us having to focus on selling space
- Allows us to concentrate on client performance

And because our network is an aggregate of our clients' needs, it's dynamic and constantly expanding, so we can leverage both our expertise and the combined volumes to give you the highest service-to-cost ratio in the industry.

SPECIFICATIONS

To deliver these “on-demand” services, Choice manages more than 400 active locations throughout 80 countries on 6 continents. We manage globally and act locally with a traditional axle-hub-spoke model which ensures accountability at the local level and oversight at the global level.

Global (Axle)

- Command Center, New York, New York

Regional (Hubs)

3 Control Towers

- New York, New York
- Amsterdam, Netherlands (Tilburg)

Choice has access to another 400 locations around the world, fully vetted both financially and operationally, so we can open a new location for you in days, not weeks or months.

VALUE-ADDED SERVICES

In addition to warehouse, inventory, and transportation management, Choice provides a host of other sophisticated services that complement the logistics value-chain, including:

- Parts Planning
- Hardware/Software Configuration
- Field Engineering
- Depot Repair
- Asset Recovery

Leverage the expertise of someone that has done it before. With over 50 years of experience, let Choice turn your supply-chain into a competitive advantage.

Learn why industry leaders trust Choice Logistics for enterprise-grade supply-chain solutions that compress time-to-market, provide differentiation, and remove costs.
