

Returns Management

Our returns management and reverse logistics solutions reduce complexities of compliance, warranty management, and end-to-end returns processing.

Choice ensures your returns are managed as carefully as your forward logistics.

Our returns management and reverse logistics solutions reduce complexities of compliance, warranty management, and end-to-end returns processing. We tailor our best-in-class returns management solution to client specific needs.

Strategic Returns Management.

Returns management has become a prerequisite for businesses dealing with in-field assets managed by service-based contracts. Best-in-class solutions are transforming returns management from a cost driver to a revenue-producing business function. To achieve this, reverse logistics activities must be integrated, unified and standardized.

Our returns management solutions are customized and tailored to your specific requirements integrating our inventory, warehousing, global trade and transportation management capabilities. With 10 regional distribution centers strategically located around the globe, more than 400 stocking locations everywhere the world does business, operating 24/7/365, Choice Logistics is uniquely positioned to deliver global program support for returns management.

Our solutions include:

- Asset Recovery Management
- Advanced Replacement
- Export/Import of Repair/Refurbished Parts
- End-of-Life Returns
- Service Management Returns
- Reverse Logistics Programs
