

# Warehouse Management

Our global warehousing services help clients optimize inventory management and reduce spend.

Our services provide clients with the agility to scale or adapt to dynamic business needs. We're equipped to manage all types of inventory and to provide value-added services like kitting, inspection, rebranding, asset recovery, recycling, and disposition.

# Efficient Warehouse Management.

Whether your needs are in support of your mission critical, post-sales or finished goods supply chain, Choice Logistics will design a customized solution to manage your company's full product lifecycle warehousing needs, anywhere in the world.

Our warehouse and distribution center management strategies can lower your costs, eliminate the burden of fixed assets or real estate obligations and add value to your supply chain. We'll apply our technology, expertise and world-class inventory management capabilities leveraging our global infrastructure of forward stocking locations and well-placed global/regional hubs and distribution centers to increase the reach and efficiency of your supply chain.

Our global warehouse management services include:

- Kitting & Bill of Material Preparation
- Parts Inspection & Rebranding
- Software Configuration
- Reverse/Asset Recovery, Recycling & Disposition

Choice Logistics' solutions let companies enter new markets and scale more quickly and with less risk or investment. Let us help you improve efficiency and add to your bottom line.
